

# KEEPING YOUR POWER RELIABLE

## Electric rates will increase in April

*We know no one wants higher electric bills. This adjustment is not the result of increased internal costs; it's a result of rising wholesale power costs. We have worked hard to manage expenses within the cooperative while continuing to deliver the reliable power you depend on every day.*

## **What's Changing?**

- The general service energy rate (kWh) will increase by \$0.0075/kWh.
- The purchase power adjustment will be a variable rate up to \$0.0014/kWh.

## **Why?**

- We are adjusting rates to address rising costs in wholesale power.

## **What hasn't changed:**

- The access charge, the demand charge, and the off-peak energy rate did not change.
